## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 12, 2009 has been entered.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of the independent claim recites "A process for preparing venlafaxine..." However, as per step (b), an acid addition salt of venlafaxine is actually prepared. This inconsistency renders the instant obvious.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1621

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dolitzky et al (WO 00/45658).

The claims are drawn to a process for preparing venlafaxine by converting a venlafaxine derivative in the presence of a salt of formic acid, wherein the molar ratio of the formic acid salt to venlafaxine precursor is 0.3-10 to 1.

Dolitzky et al teach a process for preparing venlafaxine free base by converting N,N-didesmethyl venlafaxine hydrochloride in the presence of sodium hydroxide, formic acid, and formaldehyde (p 7, example 2). The reference also teaches that venlafaxine hydrochloride can be produced by exposing a mixture of venlafaxine in acetone, to gaseous hydrochloric acid ( p 4, lines 1-4).

The difference between Dolitzky et al and the instant claims is that the reference does not expressly teach a reaction wherein the molar ratio of formic acid salt to venlafaxine recited in the instant claims is employed; however, absent a showing of unexpected results, this is not deemed a patentable difference since a person having ordinary skill in the art would have systematically adjusted the reactant concentration in order to optimize the reaction.

***Response to Arguments***

Applicant's arguments filed January 12, 2009 have been fully considered but they are not persuasive. Applicants argue that the instant claims form the acid addition salt of venlafaxine without isolation of the free base, as taught in the reference.

The examiner does not find this to be a convincing argument. First, the examiner would like to point out that as currently written, the claims do not preclude the isolation of venlafaxine prior to making the acid salt. There is no limitation that positively excludes such as step. Nonetheless, it would have been obvious to a person having ordinary skill in the art to process with making the acid salt of venlafaxine without isolating the free base if the crystal of the venlafaxine salt that is ultimately produced by Dolitzky et al is of sufficient purity for its intended use.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sikarl A. Witherspoon whose telephone number is 571-272-0649. The examiner can normally be reached on M-F 8:30-6:30.
